

# Disposable Wipes are Clogging Drain Pipes!

Many household products including disinfectant wipes, baby wipes, paper towels, mop refills and moist towelettes are labeled and marketed as "disposable" and "flushable" but the real truth is these products and many others don't dissolve once they are flushed. The products can cause problematic backups and blockages in the sewer pipes on your property and in the public sewers. Backups and blockages are unpleasant and expensive for everyone.

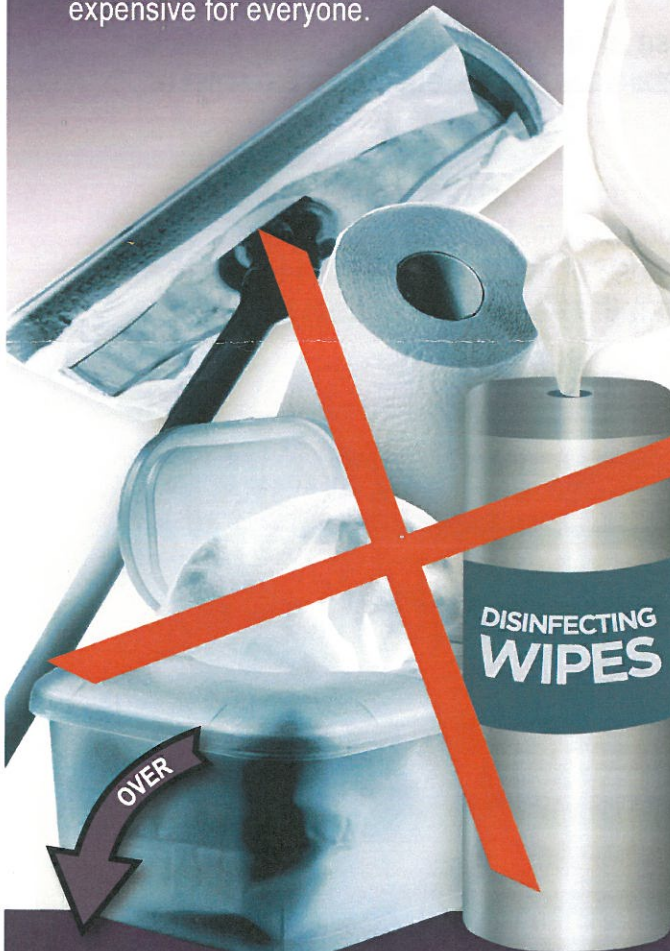

**Flush  
ONLY  
Toilet  
Paper!**

The Town of Billerica needs everyone's help! Never flush any consumer item down the toilet unless it is toilet paper. Please help save yourself and your local wastewater utility from costly repairs and ugly backups.
